

Amendments to the Specification:

Please amend the paragraph (section) beginning on page 8, at line 30 as shown below:

The exterior surface of the masking sections 10 and 12 can further be textured 11 such than any overspray paint is absorbed and does not drip or spatter, such as further during the use and subsequent removal of the masking section(s). The textured (or Mat Finish) can also be applied by other methods such as casting the texture onto the masking surface during the manufacture, embossing, or dyne treatment, and such as is further defined as the mechanical roughing or sanding of the exterior masking surface. Additional embodiments include utilizing a semi-transparent film in the construction of the masking section and in order to allow the operator to install the masking section on the vehicle and not obstruct the view of any placement lines which have been drawn on the vehicle.
